

**METHOD AND SYSTEM FOR PROVIDING  
SECURE ACCESS TO PRIVATE NETWORKS**

**ABSTRACT OF THE DISCLOSURE**

5           Improved approaches for providing secure access to resources maintained on private networks are disclosed. The secure access can be provided through a public network using a standard network browser. Multiple remote users are able to gain restricted and controlled access to at least portions of a private network through a common access point. The  
10   solution provided by the invention is not only easily set up and managed, but also able to support many remote users in a cost-effective manner.
